## PROFILE

Backend developer with more than 6 months of experience developing web applications with python using django framework with PostgreSQL and MySQL, i use html and css whit foundation framework to do the templates.
I have worked using the SCRUM agile methodology for the development of projects , using git for the version control system in the same way .

## OBJECTIVES

Be part of a company in which I can put all my knowledge into practice and in which I can grow professionally and personally by applying the new knowledge in the growth of the company and its development

Establish myself in a company that believes in the commitment and continuous training of its staff

Although I may lack professional experience, my capacity for learning, adaptation and decision make me the ideal candidate for a company that wants a young and innovative team
